PRIMARY OPERATING MARKET

Who we are

AFRIKENERGY INTERGRATED SERVICES LIMITED is an indigenous Nigerian energy and industrial services company, registered with the Corporate Affairs Commission under RC 8404525 and established in **2025**.

The company is organised around a single, integrated coordination model spanning petroleum product supply, engineering and maintenance, procurement, logistics and environmental support — built to deliver to specification and document every step.

Where we operate

Headquartered in Warri, Delta State, AFRIKENERGY works within the operating realities of the Niger Delta, combining local knowledge with structured, compliance-focused execution.

CORPORATE HEAD OFFICE

Block C-8, Plot 61 Airport Road, Opposite Delta State Tax Revenue Office, Warri, Delta State, Nigeria.

02 — WHO WE ARE

Built to support the operations that keep industry moving.

AFRIKENERGY was formed to coordinate the people, equipment, suppliers and logistics that industrial and oil & gas operations depend on — under one accountable point of delivery.

Our philosophy is integration over fragmentation. Rather than a single service, we bring together supply, engineering, procurement, logistics and environmental support so that a client requirement is planned, sourced, quality-checked, executed and closed out through one coordinated team.

We are organised to be responsive. Whether the requirement is a fuel supply order, a maintenance scope or a procurement package, the objective is consistent: deliver to specification, document the process, and close out cleanly.

AFRIKENERGY OPERATIONS PERSONNEL · CORPORATE PHOTOGRAPHY

How we work

1. **Client requirement**
   Scope and specification captured
2. **Planning**
   Method, resources, timeline
3. **Sourcing**
   Approved suppliers and assets
4. **Quality & compliance**
   Verification against standards
5. **Execution**
   Controlled, supervised delivery
6. **Delivery**
   Confirmedto client requirement
7. **Close-out**
   Documentation and hand-back

03 — WHAT WE DO

Our capability architecture.

Six coordinated service lines, delivered through a structured management and documentation framework.

01
Energy & Oil & Gas
Petroleum product supply, controlled fuel logistics and documented delivery support.

- AGO / diesel supply
- Petroleum product logistics
- Fuel transportation
- Product & quality documentation

02
Engineering, O&M & Technical
ISO 9001:2015-certified operations and maintenance services for industrial plants and electrical infrastructure.

- Mechanical & electrical maintenance
- Instrumentation & control
- Industrial plant O&M
- Technical support

03
Procurement & Supply
Structured procurement and supply from requirement definition through sourcing, evaluation, logistics and documented delivery.

- Strategic procurement
- Industrial materials & equipment
- Consumables & PPE
- Supply-chain coordination

04
Marine & Logistics
Marine logistics and field support through documented leasing, partner and operational arrangements.

- Marine logistics support
- Vessel access arrangements
- Movement planning
- Land-side coordination

05
Haulage & Transportation
Fuel and materials transportation coordinated through verified owned, leased and partner resources.

- Fuel haulage
- Materials transport
- Route & delivery coordination
- Fleet — [VERIFY]

06
Environmental & Industrial
Onshore/offshore environmental, waste-management and general industrial support for field and project operations.

- Onshore waste management support
- General industrial site support
- Construction support
- Field environmental support
- Waste handling coordination

SERVICE LINE 01 — ENERGY & OIL & GAS

Reliable Petroleum Supply. Controlled Logistics. Documented delivery.

AFRIKENERGY supplies and moves petroleum products under controlled, documented procedures aligned to client procurement and compliance requirements.

Capabilities

- **AGO / diesel supply**
  Bulk supply of Automotive Gas Oil (AGO) to industrial, marine and oil & gas operations.
- **Petroleum product logistics**
  End-to-end logistics planning from approved loading point to client delivery location.
- **Fuel transportation**
  Coordinated movement of petroleum products through verified haulage resources and controlled delivery procedures.
- **Product & quality documentation**
  Delivery notes, quantity verification, product documentation and client compliance records.
- **Client delivery & sourcing requirements**
  Delivery against approved-sourcing and compliance rules

DIESEL SUPPLY SUPERVISION

DOCUMENTED EXPERIENCE

AFRIKENERGY holds documented purchase-order experience with Renaissance Africa Energy Company Limited for the supply of Automotive Gas Oil (AGO). Supporting commercial evidence is presented in the Proof of Experience section.

Approved supply	Quality & quantity	Controlled loading	Escorted movement	To client site	Full records

PRODUCTS SUPPORTED

- Automotive Gas Oil (AGO)
- Diesel Fuel Logistics
- Bulk Fuel Delivery
- Industrial Fuel Supply

SERVICE LINE 02 — ENGINEERING, OPERATIONS & MAINTENANCE

Technical support built around operational reliability.

Operations and maintenance services for industrial plants and electrical infrastructure, delivered within our ISO 9001:2015-certified quality management system.

Certified scope: Operations and maintenance services for industrial plants and electrical infrastructure, including maintenance and technical support for mechanical, electrical, instrumentation and control equipment used in oil & gas and industrial facilities.

TECHNICAL CAPABILITIES

- **Mechanical**
- **Electrical**
- **Instrumentation & Control**
- **Industrial plant O&M**
- **Electrical infrastructure**

CERTIFICATION

ISO 9001:2015

Quality Management System

CERTIFICATE NO.

6WN7NTSI20260309NGAQM13Q

CERTIFIED SCOPE

Operations and maintenance services for industrial plants and electrical infrastructure, including maintenance and technical support for mechanical, electrical, instrumentation and control equipment used in oil & gas and industrial facilities.

VALIDITY

08 / 03 / 2029

The ISO 9001:2015 certificate is scoped specifically to operations and maintenance activities. AFRIKENERGY represents it only within that scope.

SERVICE LINE 03 — PROCUREMENT & SUPPLY

From requirement to delivery.

A structured procurement process that coordinates sourcing, commercial evaluation, quality verification, logistics and delivery against defined client requirements.

1. **Client requirement**
   Requirement and scope captured.
2. **Specification**
   Technical and commercial requirements defined.
3. **Supplier sourcing**
   Suitable suppliers and resources identified.
4. **Commercial evaluation**
   Quotations, pricing and commercial terms assessed.
5. **Quality verification**
   Product, documentation and applicable requirements verified.
6. **Logistics**
   Delivery planning and transportation coordinated.
7. **Delivery**
   Materials or equipment delivered and documented.

PROCUREMENT MANAGEMENT

Procurement capabilities

- Procurement Management
- Industrial Materials
- Equipment & Consumables
- PPE Supply
- Project Procurement
- Supply-Chain Coordination

SERVICE LINE 04 & 05 — MARINE, LOGISTICS & HAULAGE

Marine and land logistics for demanding operating environments.

AFRIKENERGY coordinates marine and land logistics to support petroleum product movement, field operations and project logistics. Marine assets are accessed through documented leasing, partner and operational arrangements and are not represented as company-owned unless specifically identified as such.

OWNERSHIP INTEGRITY

Vessels listed below are available to AFRIKENERGY through leasing / operational arrangements. Current status of each is subject to verification and is marked accordingly.

Asset classification key

OWNED | LEASED / ARRANGEMENT | PARTNER-PROVIDED | PROJECT-BASED

Marine assets available through arrangement

VESSEL	BASIS	STATUS
MV TIMIBET	PARTNER-PROVIDED	AVAILABLE
MV TOBEST	PROJECT-BASED	Subject to confirmation
MV KOME XIII	LEASED / ARRANGEMENT	AVAILABLE
MV LADY ANNE	PROJECT-BASED	Subject to confirmation

LAND LOGISTICS & HAULAGE

Coordination of petroleum product and industrial-material transportation through verified owned, leased and partner haulage resources, subject to applicable regulatory and operational requirements.

LOGISTICS PERSONNEL · CORPORATE PHOTOGRAPHY

SERVICE LINE 06 — ENVIRONMENTAL & INDUSTRIAL SUPPORT

Environmental and industrial support for field and project operations.

AFRIKENERGY provides onshore environmental, waste-management and industrial support for field and project operations, with services delivered according to client requirements and applicable operational and regulatory requirements.

- **Waste Management Support**
  Support to onshore waste handling requirements
- **Environmental support**
  Field environmental support activities
- **Industrial support**
  General industrial site support
- **Construction support**
  Support to construction activities

ENVIRONMENTAL OFFICER

AFRIKENERGY does not overstate environmental and industrial scope. Where a capability has not yet been verified against evidence, it is shown as an insertion point rather than asserted.

04 — HSE & QUALITY

Safety and quality are designed into execution.

Health, safety, environment and quality are integrated into project planning and execution, supported by documented HSE procedures and an ISO 9001:2015-certified quality management system within its defined scope.

- **HSE management**
- **Quality assurance**
- **Product quality**
- **Equipment readiness**
- **Regulatory compliance**
- **Continuous improvement**

HSE OFFICER

HSE OFFICER

PPE STANDARD

Deep-green coveralls · white safety helmet · high-visibility reflective vest where required.

HSE DOCUMENTATION

AFRIKENERGY reports HSE statistics only from verified records. Performance metrics are shown as insertion points until confirmed:

- HSE Policy
- HSE Manual
- Risk Assessment / JSA
- Emergency Response Procedures
- Incident Reporting
- PPE Requirements
- Toolbox Talk / Safety Meeting Records
- Training & Competency Records

05 — REGULATORY & INDUSTRY CREDENTIALS

Credentials, correctly classified.

Our credentials are presented according to their actual classification — regulatory permits, industry registrations, certifications and vendor registrations.

completion is not claimed without evidence.

08 — SELECTED PROJECT EXPERIENCE

Selected project experience and documented engagements.

The projects and engagements presented below are based on documented company records. Project outcomes are stated only where supported by available evidence.

CLIENT
Renaissance Africa Energy Company Limited
Nigeria
2025–2026

DOCUMENTED

ENGAGEMENT
Automotive Gas Oil (AGO) & Diesel Supply

AFRIKENERGY ROLE
Supplier — petroleum products & logistics

SCOPE
Supply and logistics coordination for automotive gas oil and diesel under documented purchase orders.

DOCUMENTED VALUE
₦165.3M+

OUTCOME
Successfully delivered more than 120,000 litres.

CLIENT
Renaissance Africa Energy Company Limited
Nigeria
2025–2026

DOCUMENTED

SERVICE
Provision of Marine Equipment

AFRIKENERGY ROLE
Supplier — Provision of Marine Houseboat

SCOPE
Provision of Marine Equipment such as 100 Man Houseboat under documented service entry and purchase order.

OUTCOME
Successfully delivered 100 Man Houseboat at Agbayama, Bayelsa State.

EVIDENCE DISCIPLINE
AFRIKENERGY populates this section from verifiable records. Placeholder entries indicate where a confirmed project should be inserted before the statement is issued to a specific client or tender.

Marine access

Operating locations

EFFURUN-WARRI, DELTA STATE.

INTEGRITY NOTE

Facilities and operational locations are presented based on verified company records and current access arrangements.

11 — PARTNERSHIPS & BUSINESS RELATIONSHIPS

Relationships, not implied claims.

AFRIKENERGY distinguishes between documented commercial relationships, vendor and contractor registrations, suppliers, strategic partners and project-based marine arrangements. Relationships are described according to the evidence available and are not presented in a manner that implies a client relationship where one does not exist.

DOCUMENTED COMMERCIAL RELATIONSHIP

- **Renaissance Africa Energy Company Limited**
  Documented supply-order experience · Vendor Code 138283

REGULATORY & INDUSTRY REGISTRATIONS

- **NCEC / NOGIC JQS — NCDMB**
  Industry registration
- **NUPRC · NMDPRA**
  Regulatory permits
- **NIPEX — Nigerian Petroleum Exchange**
  Industry registration

MARINE ASSET ARRANGEMENTS

- **Leasing / operational arrangements**
  Vessels available through arrangement — see Section 07

SUPPLIERS & STRATEGIC PARTNERS

- **Matrix Energy Group / Matrix Depot —** petroleum product sourcing
- **TIMIBET Oil and Gas Limited —** Marine / logistics

CLIENT INTEGRITY

Where only a vendor registration exists, it is described as “Registered Vendor / Contractor.” Where a purchase order exists, it is described as a “Documented Commercial Relationship.” Vendor registration is never presented as a client relationship.

12 — COMMUNITY & NIGERIAN CONTENT

Nigerian content, local participation.

As a Nigerian company, AFRIKENERGY supports local participation through Nigerian employment, local supplier engagement, skills development and project-based community participation.

Community and local-content indicators are reported using available company records and verified project data.

NIGERIAN WORKFORCE

Personnel supporting management, engineering, operations, HSE, quality, procurement, logistics and administration.

WOMEN IN THE WORKFORCE

Women represented in technical, quality, HSE and administrative roles

TRAINING & SKILLS DEVELOPMENT

AFRIKENERGY engages relevant community stakeholders and incorporates environmental considerations into project planning and operational activities, in accordance with applicable project and HSE requirements.

LOCAL SUPPLIER PARTICIPATION

Engagement of Nigerian suppliers and service providers across petroleum products, logistics, marine support, engineering, equipment and other operational requirements.

COMMUNITY & ENVIRONMENTAL ENGAGEMENT

AFRIKENERGY engages relevant community stakeholders and incorporates environmental considerations into project planning and operational activities, in accordance with applicable project and HSE requirements.

13 — WHY AFRIKENERGY

Evidence-backed reasons to engage us.

Not superlatives, but differentiators supported by the credentials, experience and operating model presented in this statement.

01 Integrated service model
One coordinated team supporting petroleum products supply, engineering, procurement, logistics and environmental services.

02 Procurement & logistics coordination
A structured requirement-to-delivery process supported by documentation, coordination and tracking at key stages.

03 Compliance-focused execution
Work is planned and executed with attention to applicable regulatory, HSE, quality and client requirements, supported by documented processes and records.

04 Quality management system
ISO 9001:2015 certified for the certified scope of Operations and Maintenance services, valid until 8 March 2029.

05 Marine & field support capability
Marine and field logistics resources can be mobilised through documented charter, leasing, partner and project-based arrangements, subject to project requirements.

06 Nigerian operating knowledge
Nigerian company with practical understanding of operating, logistics and stakeholder requirements within the Niger Delta environment.

07 Partnership-enabled scale
Capacity extended through documented vendor, supplier and marine arrangements, enabling resources to be mobilised according to project requirements.

08 Responsive client service
Structured to plan, source, coordinate, execute and close out activities against defined client requirements.

DOCUMENTED COMMERCIAL EXPERIENCE
Petroleum product supply engagements documented through purchase orders with Renaissance Africa Energy Company Limited.

₦165.3M+ documented PO value
